The Hiring Manager

ARIPO

P.O BOX 4228

11 Natal Road,Belgravia,Harare

Dear Hiring Manager,

I am writing to express my strong interest in the Full Stack Software Engineer position at ARIPO. With five years of progressive experience building enterprise-grade web applications — and a particular specialism in Learning Management Systems for educational institutions across Zimbabwe — I am confident I can contribute immediately and grow with your team.

My technical toolkit centres on **Angular, Node.js/Express, TypeScript, JavaScript, HTML, and PostgreSQL** — the full stack required to deliver performant, maintainable applications from database schema to polished user interface. At TRYNOtech Solutions I architected an LMS network serving over a dozen schools, engineered a ZIMRA-compliant Point-of-Sale system, and mentored junior developers — all while holding sole technical ownership of the product architecture. At EduSphere Technologies I delivered a university LMS that handled 3,000+ concurrent users, implementing JWT authentication, role-based access control, and RESTful APIs consumed by both web and mobile clients.

What sets me apart is the intersection of my software engineering capability and my educational background. Holding both a **BSc (Hons) in Information Systems** and a **Postgraduate Diploma in Education** from Midlands State University, I understand both the technical demands of scalable software and the pedagogical needs of learners and educators. This dual perspective has enabled me to build platforms that teachers actually want to use and that students genuinely engage with.

I am equally comfortable owning an entire project lifecycle — from stakeholder discovery through deployment and post-launch support — and contributing as part of a larger engineering team. I thrive in environments where quality, speed, and user impact are taken seriously, and I bring a track record of shipping complex systems on time and within scope.

I would welcome the opportunity to discuss how my skills and project experience align with your requirements. I am available for interview at your convenience and can provide a live demonstration of any of the systems mentioned in my CV. Thank you for your time and consideration.

Yours sincerely,

Trynos Zhou

Full Stack Software Engineer
